Many seriously ill children can spend months and even years in hospital. Here are some of the ways we help to transform life for seriously ill children, young people & their families across the UK.

Our WellChild Nurses help seriously ill children on their journey out of hospital, to get them home with their family...

Sometimes, seriously ill children can’t get outside in the garden to play...

Our Helping Hands Team do garden and home makeovers so that they can play safely.

Our WellChild Family Tree connects families with seriously ill children so they can chat and support each other.
