Home Assessment Form for Children and Young People (CYP) with complex needs/ on Long Term Ventilation (LTV) guidance note.

Definition:

A home visit is completed to risk assess the CYP's home environment ensuring it is safe and suitable to meet their physical, medical and developmental needs prior to discharge home.

Professionals completing the visit:

The home assessment form should be completed by an occupational therapist depending on the local area, this could be the hospital occupational therapist or the social services occupational therapist from the local area. Which occupational therapist completes the visit should be negotiated locally. Ideally the home assessment would be undertaken jointly by an OT and a member of the nursing team.

There may be situations when the named nurse/community nurse completes the home screening visit due to an occupational therapist not being available or a joint visit is required. This being the case, it is recommended that the nurse and occupational therapist liaise and discuss the case before the visit and that this form is used. Once the visit is completed, the OT and nurse should liaise again to discuss the outcomes of the visit. The occupational therapist and nurse can then make recommendations based on their clinical reasoning of the outcome of the visit.

The decision to complete a home visit should involve an MDT discussion. The consultant will be responsible for providing information as to the medical stability of the CYP.

The named child/YP's nurse/discharge coordinator will be responsible for:

Managing the end to end discharge process. This includes collating information that will be relevant for discharge such as the CYP's developmental needs in relation to their LTV need, oxygen requirements, onward referrals specifying community nursing requirements to meet patient needs. The nursing team in conjunction with the MDT and family will consider housing needs, making recommendations on the suitability of their current property with considerations of potential future accommodation needs.

Preparation for visit:

Ensure families understand the visit's purpose, which could include assessing the home for suitability for discharge, evaluating the suitability of existing equipment, or considering suitable equipment for the space.

Understanding phrases used in the assessment will be helpful too. For example, you can clarify that 'a room for the CYP' doesn't exclusively mean a bedroom; any suitable room in the property may be considered, based on the child's needs, such as a downstairs room like a dining room or living space being repurposed as a room for the CYP, for better accessibility for necessary equipment.

Notes/considerations for completing the Home Assessment Form

Version 4, November 2025

2.

Document developed by Pan London LTV Collaborative in partnership with WellChild.

Housing history	
Property type:	<ul style="list-style-type: none"> - What floor the CYP will be living on in a house? - What floor their flat is on? - What level they will live on if in a maisonette?
Tenure:	Any adaptations that need to be made in preparation for discharge or looking to the future will need the consent of the owners, leaseholders and/or managers of the property.
Housing Officer contact details:	Name, contact number and email.
Specify (e.g. lease, named officer, etc.):	<ul style="list-style-type: none"> - The name of the local authority - Reference number - Length of lease - Any other contacts the parents/carers have with them to smooth the process going forwards.
Who else lives at this address?	Other residents might also have needs which impact on the flexibility of the home environment to the needs of a child with ventilation.
Are there any pets at this address?	Pets may affect the staff that are able to work in the home environment e.g. allergies.
Physical environment – from the street to the property's front door/entrance	
Parking – on street & off street:	<ul style="list-style-type: none"> - How will the CYP manage a transfer from a car to the property? - Is there a private drive? - Could there be an allocation of a specific and/or disabled parking space?
Front & rear access:	<ul style="list-style-type: none"> - Which would be the most appropriate access for the CYP into the home environment? - Is it necessary for discharge?
Layout:	
Child's bedroom	<ul style="list-style-type: none"> - Where are these rooms in the property? - Could adaptations to routines be made for discharge e.g. fill a mobile bath from the kitchen and negate the need to navigate an additional floor? - What are the needs of the carers (access to hand hygiene facilities and toilets for example)?
Bathroom	
Kitchen	
Toilet	
Heating	<ul style="list-style-type: none"> - Poor heating increases the risk of damp. - Use of electrical sockets. <div style="display: flex; align-items: center;"> <div style="flex: 1;"> <p>Consider referring the patient/family to their Local Energy Advice Partnership for energy and money saving advice.</p> <p>www.ltv.services/LEAP</p> </div> <div style="flex: 0.5; text-align: center;">  <p>REFER TO LEAP</p> </div> </div>
Physical environment – CYP's bedroom	
Access (from entrance): 1	How does the CYP access their room?
Flooring:	<ul style="list-style-type: none"> - Ease of movement of equipment (cot, chair, hoist). Consideration of laminate/wood/hard flooring if the CYP has hoisting requirements - Laminate flooring is easy to clean but carpet can be good for children when they start to play independently on the floor and are learning to crawl.
Lighting:	<ul style="list-style-type: none"> - Good lighting is essential for cares - Night carer requires a lamp in order to not disturb CYP yet manage cares - Pendant/ceiling lamps should be reviewed, to ensure these do not interfere with safe hoisting.
Equipment*/Facilities:	
Cot 2	<ul style="list-style-type: none"> - Does it need collapsible sides on 1 side or both sides? - Does it need to be accessed on 1 side or both sides? - Does it need to be profiling (adjustable angle)?

Version 4, November 2025

3.

Document developed by Pan London LTV Collaborative in partnership with WellChild.

	<ul style="list-style-type: none"> - Does it need to be compatible with a pressure mattress? - Does it need to be quickly height adjustable? - Whose needs are being addressed and therefore who provides the cot?
Trolley	<ul style="list-style-type: none"> - On wheels with brakes or free-standing?
Hoist	<ul style="list-style-type: none"> - Is a hoist required for discharge? - What is already in the home environment? - When did the hoist have its last service? - Are the carers trained to use a hoist?
Seating	<ul style="list-style-type: none"> - Is there a high-back chair for a night carer to sit in?
Wall plug sockets	<ul style="list-style-type: none"> - Are there enough wall sockets for the electrical equipment required (see equipment list)?
Storage	<ul style="list-style-type: none"> - Is there enough storage in the room for the consumables (see equipment list)?
Space	<ul style="list-style-type: none"> - Is the side of the cot or the head of the cot against a wall? - Is there enough room for all other needs (manual handling, storage)? - Consider the cots location in relation to radiators and windows.
<p>Where a child has Long Term Ventilation needs it would be useful to take the Equipment for your CYP document (Appendix F) for the child on the Home Assessment visit.</p>	
<p>Physical environment – bathroom</p>	
Access (from entrance) and flooring:	Even if it is agreed that the CYP will not need to access this room collecting this information will be useful to plan for the long-term environment.
<p>Equipment*/Facilities:</p>	
Bath	<ul style="list-style-type: none"> - What is it made of? - What is its condition? - Is there a suitable hoisting system as necessary? - Is the CYP suitable to be bathed? - Do you have waterproof covers for the ventilator?
Shower cubicle	<ul style="list-style-type: none"> - Is there suitable access for a carer to shower the CYP?
Over-bath shower	<ul style="list-style-type: none"> - What equipment is in situ in order for the CYP to be able to use this facility?
Bath seat	<ul style="list-style-type: none"> - Does the CYP have seating needs that are a consideration when bathing? - Where is a seat going to be positioned?
Mobile bath	<ul style="list-style-type: none"> - Where is it stored? - How is it filled and emptied?
<p>Physical environment – kitchen</p>	
Access (from entrance):	<ul style="list-style-type: none"> - What is access like for lone carers? - Where is the location in relation to the room the CYP will usually be in?
Flooring:	<ul style="list-style-type: none"> - Rugs may be a trip hazard. - Again, it might be useful to collect information to plan for the long-term environment.
<p>Physical environment – toilet (closest to bedroom)</p>	
Access (from CYP's bedroom for carer):	<ul style="list-style-type: none"> - Describe the toilet that is nearest to where the CYP will sleep - What is access like for lone/night carers?
Flooring:	<ul style="list-style-type: none"> - Are there any trip hazards (rugs, wires, etc.) e.g. for night carers?
<p>Physical environment – toilet (closest to play/living room)</p>	
Access (from CYP's bedroom for carer):	Describe the toilet that is nearest to where the CYP will be cared for during the day as this may be different from where they sleep.
Flooring:	Are there any trip hazards (rugs, wires, etc.) e.g. for night carers?

Physical environment – general safety		
Electricity:	Billed and direct debit payment is usually advised. Please seek further guidance on prepayment meters from your clinical team.	
Safety		
No toxic materials within reach	E.g. cleaning agents, medicines, toiletries.	
Corner guards	For when child is cruising.	
Appliance safety catches on cooker	Oven, hob switches and microwave.	
Drawer and cupboard locks	To contain sharp and heavy objects.	
Stair gates	These may also be useful to stop movement between rooms.	
Fire brigade	Local service is available to provide an environmental assessment, plan emergency evacuation route and prioritise the household in the event of a local emergency.	
Insurance and mortgage companies	Insurance (and on occasion mortgage) companies need to be notified of ventilator equipment and oxygen in use in the property.	
Energy suppliers and water board	Notify suppliers that a technology dependent CYP is resident in the property in case of a supply issue.	
Ambulance directive	Ordinarily this is a matter of process during discharge, but it is important to check.	
Recommendations - examples		
Issue Arising from Home Assessment	Action Points (including date)	Responsibility
1, 3 & 4. Rugs on floor in CYP's bedroom and the bathroom present a falls hazard to carers.	a) Discussed at Home Assessment and they will be removed from these rooms by 1 week.	a) Parents.
2. Cot in situ has 1 drop-down side and is manually height adjustable.	a) Liaison with Care agency regarding the Health and Safety Needs of their carers who will be caring at the cot-side by 1 week. b) Liaison with community equipment store regarding availability of profiling cot by 1 week.	a) Community Nurse. b) Occupational Therapist.

Home Assessment Form for Children/Young People (CYP) on Long Term Ventilation (LTV)

This form should be used to guide the assessment of the suitability of the home environment for a child with complex/ LTV needs. Where applicable, tick appropriate boxes to indicate this has been observed in the environment.

**Notes/considerations for completing the Home Assessment Form from [page 3](#).*

Equipment required:

- Camera
- Tape Measure

Any issues that arise should be noted numerically in the righthand column. Details should then be added to '**recommendations**' on [page 9](#) (see example on [page 5](#)).

Recommended:

- Appendix F – 'Equipment for your child'
